Residence - Charleston, United States.

Sir George Stonhouse, the third baronet, was fined £ 1,460 for his loyalty to Charles I. He surrendered his father's patent of creation, and had a new granted to himself for life, with remainder to his second son, John, and his heirs male, intending thereby to exclude his first son. The elder son, however, on his father's decease, claimed and enjoyed the baronetcy created by the original patent, so that there were two baronetcies in the family till on the death (without issue) of Sir John, 6<sup>th</sup> baronet under the old creation, they became united in Sir John, 3<sup>rd</sup> baronet of the new. The 11<sup>th</sup> baronet, having been for twenty three years Physician to the Northampton Infirmary, took Holy orders, and subsequently became an eminent preacher.

## UK surname frequency, 1851-1996

### The top 88 surnames in 1996 compared to the 1851 UK census

In the soc.genealogy.uk+ireland news group a question was asked about the most frequently found surnames in the UK. John Wynn published a comprehensive report of the top 88 surnames based on his analysis of the 1996 electoral rolls, which are open to public scrutiny. These same 88 surnames have been looked at in the 2% sample of the 1851 census, which I have recently converted from ESRC text transcripts into a database format and supplied with a search engine. [Full details](#) of this program are also on this web site. The table below examines the winners and losers in the surname top 88 charts.
